

Welcome to your Medical Home!

Personalized Care

Your team may include a doctor, nurse, nurse practitioner, medical assistant and a health educator, as well as other health care professionals like a pharmacist or nutritionist. These team members are like having "health coaches" who help you get the care and services that are right for you. Remember **you, the patient, are the most important member of the team.**

Coordinated Care

- **Your team** works with other medical experts if needed and support you every step of the way.
- **Your team** will have all of your records in one place and can help you track health information.
- **Your team** offers connections to community services and access to the Insurance Marketplace.

FRANKLIN
PRIMARY
HEALTH CENTER INC

Comprehensive Care

- **Your team** can help you set goals for your care and help you meet your goals one step at a time.
- **Your team** can answer your questions and help you better understand your healthcare needs.
- **Your team** provides self-management education/support for chronic conditions.
- **Your team** uses evidence-based best practices.

Convenient Care

- **Your team** has convenient office hours for your appointments including after-hours care and telehealth.
- **Your team** is committed to your health care needs. Call them with any questions you may have before or after your appointments.
- **You** can always get an appointment quickly, even on the same day when needed.

A medical home is the **one** place you and your family go for **all** of your healthcare needs including but not limited to checkups, sick visits, accidents, special health needs, and immunizations (shots). **Patient-centered** is a way of saying that you are the most important member of **your health care team**. Every effort will be made to make sure you see the same providers each time you visit **your medical home**.
